## Count on ABB solar solutions

### Digital. Smart. Integrated.

Visit ABB at Intersolar Europe!  
May 15-17, 2019 – hall B2, stand 210

Join us at Intersolar Europe and learn about the latest innovations in our sun-to-socket portfolio!

ABB will be showcasing its latest solar solutions which bring together digitalization, smart inverter capabilities and integrated solutions. These include products for smart homes, smart buildings and smart power generation as well as storage solutions and microgrid applications.

#### Don't miss these exciting exhibition highlights

- The next generation PVS980-58 central inverter solution, nominated as finalist for the Intersolar Award
- Complete solutions for utility-scale solar power generation, balance of system (BoS), power collection, grid connection and Energy Storage Systems (ESS)
- Smart commercial & industrial solar and storage solutions, including three-phase PVS string inverters and the battery

energy storage system PQpluS

- Digital solutions for smarter solar applications including installer and end customer Apps as well as latest insights on blockchain technology
- New generation of residential solar solutions for self-consumption optimization, including REACT 2 and UNO-DM-PLUS-Q

We also invite you to join our cocktail happy hour on Wednesday, May 15 at 6 p.m. at the ABB booth where you can meet our experts and industry partners.
