

**TSC PowerXT[®] Now Available for Sale in Europe Through VP Solar,
One of Europe's Largest Electrical Distributors
*Patented PowerXT[®] Delivers Aesthetics, Efficiency, and Power***

OAKLAND, CA, / PEDEROBBA, ITALY JULY 9, 2020 – TSC, a global provider of solar module technologies, today announced that its patented PowerXT[®] panels are now available through VP Solar, one of Europe's largest distributors of photovoltaic products, serving the European solar market. PowerXT[®] delivers a high performance, sleek Pure Black[™], high-efficiency panel.

"We're honored to be welcoming VP Solar - a highly respected electrical distributor - to our global family of solar distributors," said Andrea Antolini, TSC's South Europe Business Development Manager. "VP Solar is a prestigious partner; their service and technical support in the solar industry is of the highest caliber. The mission of VP Solar and TSC are completely aligned: to provide customers with the best solution on the market when it comes to performance, efficiency and aesthetics."

"There's growing demand for TSC panels throughout Europe," said Stefano Loro, CEO, VP Solar. "TSC's reliable solar products are the right choice for the installers interested in quality and high efficiency and power, recognizing the outstanding engineering and performance of this premium solar panel. We're proud to be offering TSC PowerXT[®] throughout Europe."

"TSC is the European division of a U.S. Silicon Valley company, with 20 years of solar innovations," add Antolini. "Optimized for residential and commercial deployment, our high density and technologically-advanced PV panels have been extremely well-received – as they deliver beauty, efficiency and power."

Engineered to maximize energy production, TSC PowerXT[®] solar panels have set a new standard in PV panel performance by significantly boosting power generation and eliminating common failure points that can reduce traditional PV panels' long-term performance.

PowerXT maximizes power and energy yield on customer roofs – empowering customers and dealers to install attractive, cost-effective solar arrays. Certified to highest quality standards for reliable power, TSC PowerXT offers a comprehensive 25-year warranty on power, parts, and labor.

About TSC

TSC is a global PV technology and systems company, with a strong track record and 20-year history in solar power innovation and product development.

TSC is paving the way for distributed, clean power generation by building advanced solar panels and fully integrated systems.

Using advanced patented technology, proven field performance, and sophisticated automation, TSC delivers solutions that address a unique set of requirements for residential and commercial solar markets. For more information, visit www.solaria.com/europe

About VP Solar

VP Solar has been a B2B distributor of energy systems since 1999: photovoltaics, renewables, energy saving and innovative technologies. VP Solar provides solutions and knowledge to both Italian and international resellers and installers, in partnership with the leading worldwide manufacturing companies. Our challenge: to be a leader of the new market of energy systems together with our partners, with a long-term and sustainable business approach based on competences and quality.
